

Participant Resource Guide

Copilot Studio Bootcamp Day 3

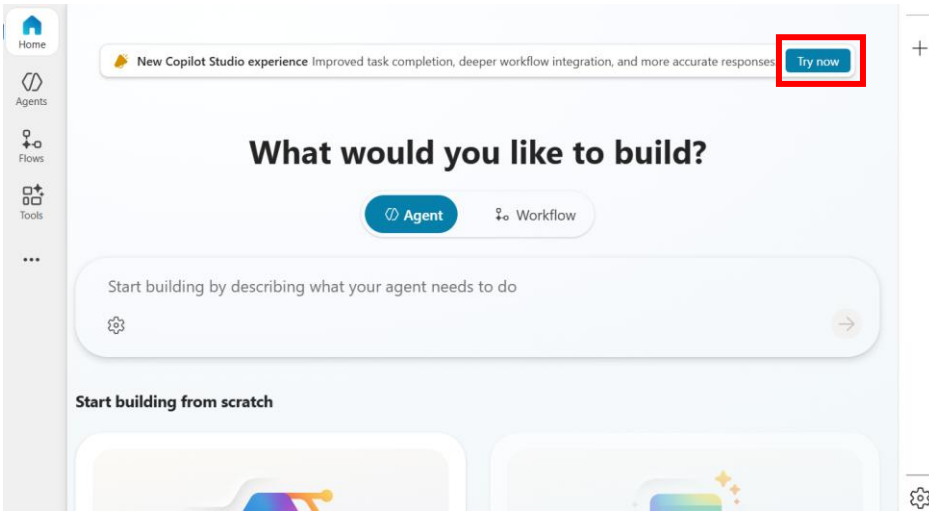

24 Sep 2026, 9:30 AM – 12:30 PM

Name:

protiviti[®]
Global Business Consulting

Table Activity 6

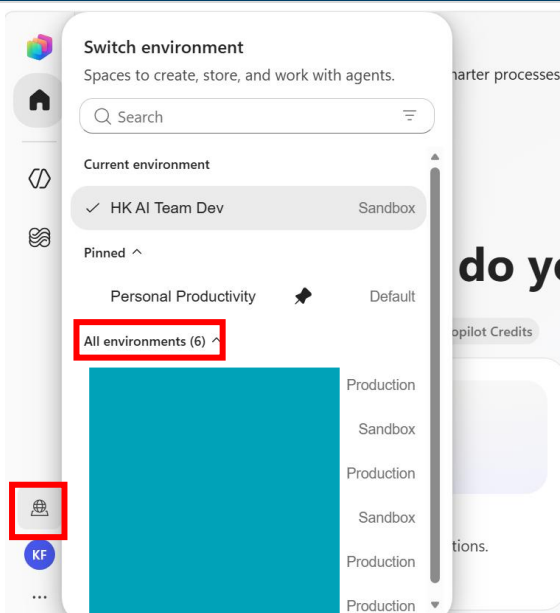

Objectives:	 60 minutes (Task 10 + Task 11)
- Design and build a standalone Goal Tracking Agent - Create an agent tailored for tracking and recording employee's goals using the Github Harness Copilot Studio.	
- Explore Github Harness Copilot Studio Fundamentals - Understand the core components of Github Harness Copilot Studio - Learn best practices for agent design, including writing instructions, skills and handling tools.	

Task 10: Create a Goal Tracking Agent	Notes
1. Open the URL: https://copilotstudio.preview.microsoft.com/. Or from the classic experience page, click the 'Try now' button if the new experience prompt appears at the top. 	
2. You might see a message pop up from your admin, click 'Close' if it appears	

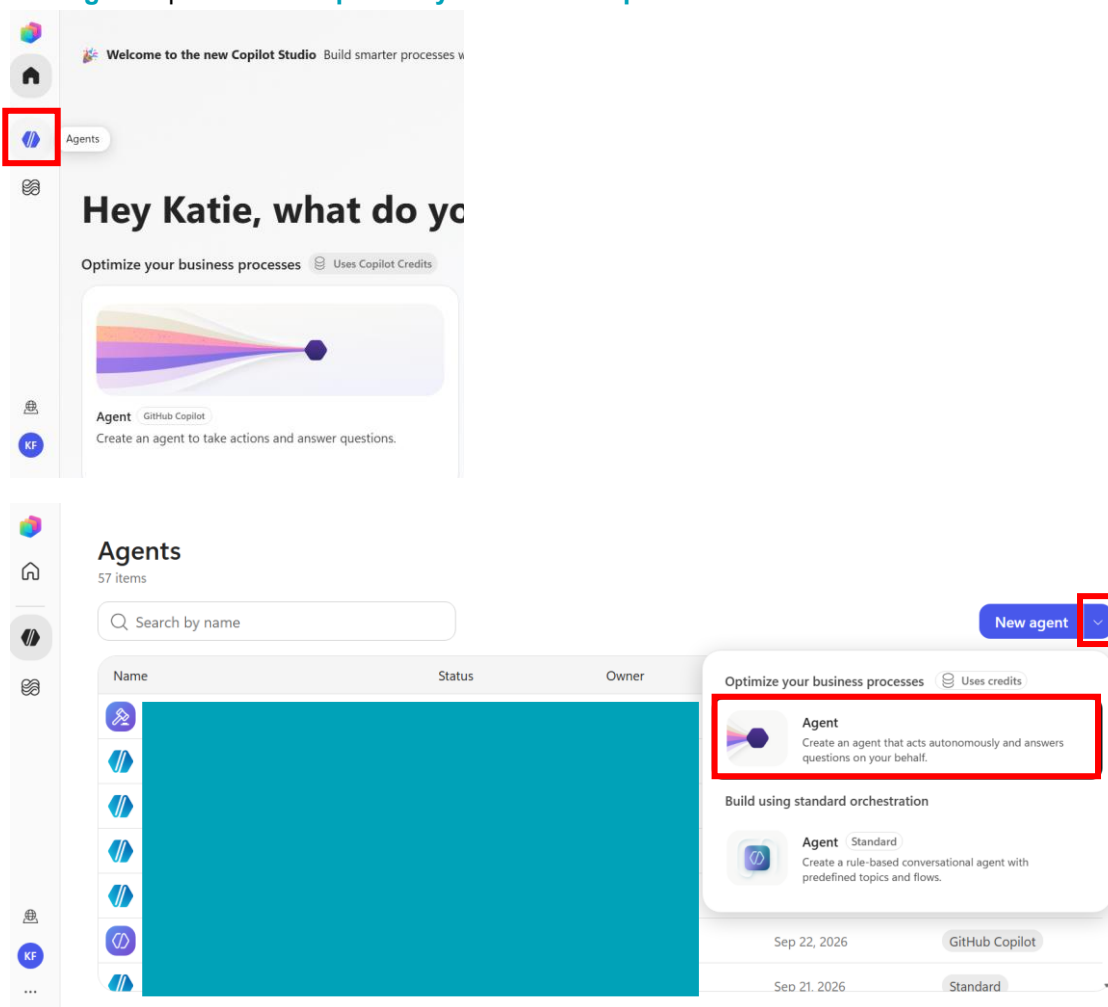

Task 10: Create a Goal Tracking Agent	Notes
Welcome from your admin ✕ Welcome to the Power Platform Development made Easier. Better. <i>Faster.</i> Important Information This development environment supports Copilot Studio. Sharing is blocked Create a pipeline to deploy your solution to your test environment Please review the following guidelines: 1. Documentation: Power Platform CoE SharePoint Site 2. Support Power Platform Support Community: Close	
3. You should see the home page of the Github Harness Copilot Studio, looking like this:	
4. Check if you are in the right environment – click on the environment icon to see if you are in the right one, if not, click on ‘All environments’ on the left sidebar to view the full list and select the right one.	

Task 10: Create a Goal Tracking Agent

Notes

5. After confirming you are in the correct environment, click on the '**Agents**' button on the left side bar. In the Agents page, click on the dropdown next to the '**New Agent**' button, and select the first '**Agent**' option under '**Optimize your business process**'.

Task 10: Create a Goal Tracking Agent

Notes

6. You should now see your new agent page, start by naming your agent: '**<Your full name's> Goal Tracking Agent**'

The screenshot shows the 'Build' tab of the agent creation interface. The agent is named 'Lik's Goal Tracking Agent', which is highlighted with a red box. The 'Instructions' section contains a placeholder text: 'Instructions tell your agent how to behave, what it should help with, and how it should respond.' The right sidebar shows configuration options: 'Model' is set to 'GPT-5 Chat', 'Channels' is empty, 'Skills' is empty, 'Tools' is empty, 'Knowledge' has a toggle for 'Search all websites' which is currently on, 'Connected agents' is empty, and 'Memory' is set to 'Off'.

7. Click on the text space under '**Instructions**' and paste the provided instructions from Table Activity Materials.

The screenshot shows the 'Lik's Goal Tracking Agent' page. The 'Instructions' section is highlighted with a red box. The text in the instructions section is: 'You are Goal Tracking agent, a supportive personal development coach. Your purpose is to help employees:

- Create meaningful development goals
- Track their growth and achievements
- Reflect on progress
- Identify opportunities for further development
- Communicate progress professionally with their manager

 You support the following goal categories:

- Workforce
- Personal
- Volunteering
- Wellbeing

'

8. On the right card with all the agent's config, we want to make sure of the following:

- Model – **GTP-5 Chat**
- Knowledge – Turn off '**Search all websites**' by clicking on the '**X**' next to it
- Memory – **Off**

Task 10: Create a Goal Tracking Agent

Notes

The screenshot shows the configuration panel for a goal tracking agent. The 'Model' dropdown is set to 'GPT-5 Chat'. Below it are sections for 'Channels', 'Skills', 'Tools', 'Knowledge', 'Connected agents', and 'Memory'. The 'Memory' section has a toggle switch that is currently turned off. Red boxes highlight the 'GPT-5 Chat' dropdown, the 'Search all websites' button in the Knowledge section, and the 'Memory' toggle switch.

9. Next, let's add a document as a **Knowledge** source. Click on '**Knowledge**' on the right card, a dialog should popup, choose '**SharePoint**'.

The screenshot shows the 'Add knowledge' dialog. It has a title bar with a close button. Below the title is a subtitle and a link to 'Learn more'. There is a large area for 'Drag and drop or click to upload'. Below this are two tabs: 'Featured' and 'Advanced'. Under the 'Advanced' tab, there are two options: 'Public websites' and 'SharePoint'. The 'SharePoint' option is highlighted with a red box. At the bottom right is a 'Cancel' button.

10. Insert the link provided in the Table Activity Materials, then click '**Add**'. You should see the document loaded from SharePoint. Change the description to this: '**This knowledge source provides a guide on how to write SMART goals**'. Click '**Add to agent**' when done.

Task 10: Create a Goal Tracking Agent

Here's the standard structure for writing a SMART goal based on the document:

+ Ask a question or describe what you need

Task 11: Using Skills and Tools

Notes

1. Make sure a SharePoint list called **Goals List** has been created and you have access to it.

Goals List ☆ ⓘ

🔍 📄 ⚙️ All Items + Add view

Goal ID	Goal Category	Created By	SMART Goal	Success Measure	Goal Status	Ta
GOAL-20260921-001	Volunteering	Katie Fan	By 31 December 2026, I will volunteer at a local soup kitchen every 2 weeks and complete at least 20 hours of volunteering to support community members in need.	Minimum of 20 hours volunteered at a soup kitchen by 31 December 2026, tracked through sign-in records or personal log.	In Progress	12/
G-20260921-001	Wellbeing	Katie Fan	From now until 31 December 2026, I will practice meditation at least 3 times per week to improve mindfulness and reduce stress.	Maintaining a routine of at least 3 meditation sessions each week, tracked in a personal log or app.	In Progress	12/

2. In your Goal Tracking Agent, we want to start adding skills. Click on the right card. Then on the Add skill dialog, choose: 'Create from blank'.

Model GPT-5 Chat

3. We want to start by creating a skill for **Creating Goals**, fill in the **Name**, **Description** and **Instructions** provided in the Table Activity Materials. Then click 'Create'.

Task 11: Using Skills and Tools	Notes
Add skill Upload a skill Create from blank Name * ⓘ create-new-smart-goal 21 / 64 Description * ⓘ 1. The user is providing a progress update against an existing goal. 2. The user is asking for recommended activities after a goal has already been created. 3. The user is asking to notify their manager. 4. The user is only asking for a summary of previous development activity. 572 / 1024 Instructions * Create Cancel 4. Next, we must connect and add the tool that our newly added skills need. Click on ‘Tools’ on the right card. Model GPT-5 Chat Channels Define where users can interact with the agent. + Skills Define behaviors through structured instructions + create-new-smart-goal × Tools Connect the agent to external systems and actions + Knowledge Provide trusted context to guide decisions + How+to+write+SMART+Goals+v2.pdf × Connected agents Collaborate across agents to complete work + 5. In the ‘Add a tool’ dialog, we want to find the tool ‘Create item’ under SharePoint. (Either search on the search bar or click on SharePoint, then scroll down and find ‘Create item’) Click ‘Add’ once you find it. Add a tool Search + Add Featured MCP Connectors Workflows Office 365 Outlook Microsoft Teams SharePoint OneDrive for Business Excel Online (Business) Microsoft Dataverse	

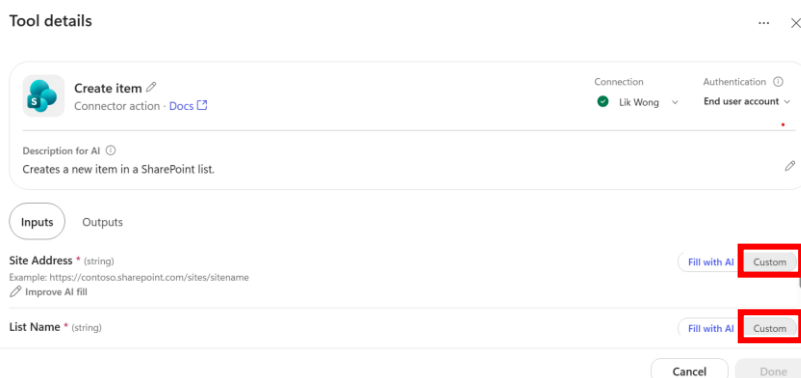

Task 11: Using Skills and Tools

Notes

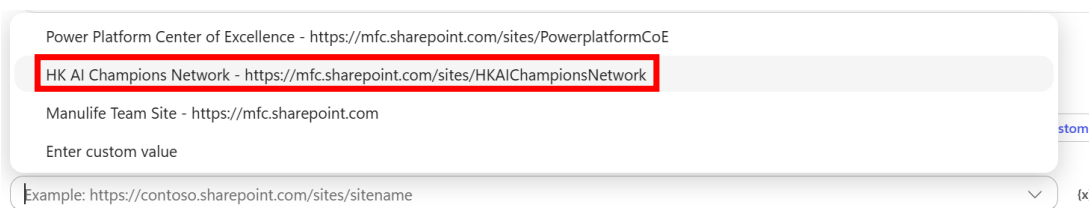

6. Open the 'Create item' tool you just added to configure the inputs so that it knows to use our Goals List.

We want to change the inputs for **Site Address** and **List Name** to **Custom**.

You should be able to choose from the dropdown, choose the right **Site Address**, or copy and paste from the Table Activity Materials.

Choose **Goals List** from the dropdown for **List Name**.

Task 11: Using Skills and Tools	Notes
Afterwards, you should see the columns of the list automatically. Make sure these are all 'Fill with AI', then click 'Done'. Goal ID * (string) Improve AI fill Fill with AICustom Optional parameters Showing 0 of 9 CancelDone	
7. Save and test these new changes by going to the Preview tab. Prompt it by starting with: 'I want to start helping out at soup kitchens'. Lik Wong's Goal Tracking Agent New chatHistoryEnd user preview I want to start helping out at soup kitchens Lik Wong's Goal Tracking Agent Reasoned through your request Loading skill: create-new-skill Helping out at soup kitchens sounds fantastic — this clearly fits as a Volunteering goal. To make it SMART, I need a bit more detail: 1. How often would you like to volunteer (e.g., once a week, to month)? 2. Do you have a target date to start or complete your first few volunteering sessions? You should see your skill being loaded. The agent should then ask for more details, follow up with: 'I want to do it at least once every 2 weeks, up to end of this year'. I want to do it at least once every 2 weeks, up to end of this year Lik Wong's Goal Tracking Agent Great! Here's a draft of your SMART goal: Goal Category: Volunteering SMART Goal: By 31 December 2026, I will volunteer at a soup kitchen at least once every two weeks to support my community and gain hands-on experience in charitable activities. Success Measure: Attend at least 7 volunteering sessions at a soup kitchen between now and 31 December 2026, and record dates of each attendance. Target Date: 31 December 2026 Next Review Date: 22 October 2026 Would you like to confirm this goal, or make any adjustments before we save it? Once satisfied with the agent's draft of your new goal, give it confirmation by saying 'Yes'. yes Lik Wong's Goal Tracking Agent Thought for 4 seconds Create item Your volunteering goal has been successfully saved! Here's the final detail: SMART Goal: By 31 December 2026, I will volunteer at a soup kitchen at least once every two weeks to support my community and gain hands-on experience in charitable activities. Success Measure: Attend at least 7 volunteering sessions and record each attendance. Target Date: 31 December 2026 Next Review Date: 22 October 2026 Would you like me to help you notify your manager or suggest some additional volunteering-related growth activities? Observe the 'Create item' tool being called, go to the Goals List to check for a new entry.

Fill in the **Name**, **Description** and **Instruction** provided in the Table Activity Materials. Then click 'Create'.

Add skill ×

Upload a skill Create from blank

Name * 🗨
progress-update 15 / 64

Description * 🗨
This skill identifies the relevant goal, summarizes the update, estimates progress where possible, and recommends next steps. Use this skill when the user provides an update on work completed, achievements, milestones, learning activities, challenges, or progress related to an existing development goal. 567 / 1024

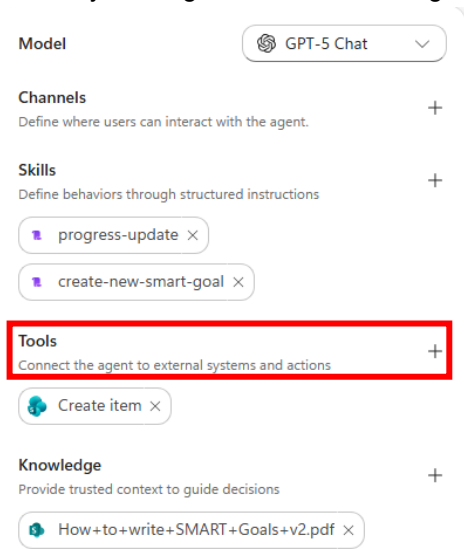

Instructions * 🗨
Classify and Log Progress Updates
When this skill is activated
Step 1: Auto-Lookup Related Goal
1. Review the user's update text and identify the most relevant **category** (Workforce / Personal / Volunteering / Wellbeing).
2. IMMEDIATELY query the SharePoint Goals list for this user's goals in the detected category.
- Filter: 'GoalCategory eq "<category>" AND "Author eq current user".
- Use 'GetItems' to retrieve top 10 results.
3. **Try to match the update keywords** (from the SMARTGoal or Title) to the user's update for the best candidate goal.
4. Handle outcomes:
- **Single clear match** → Proceed to update that goal automatically.
- **Multiple matches** → Present candidates to user to choose.
- **No match** → Propose creating a new SMART goal before logging progress.

Create Cancel

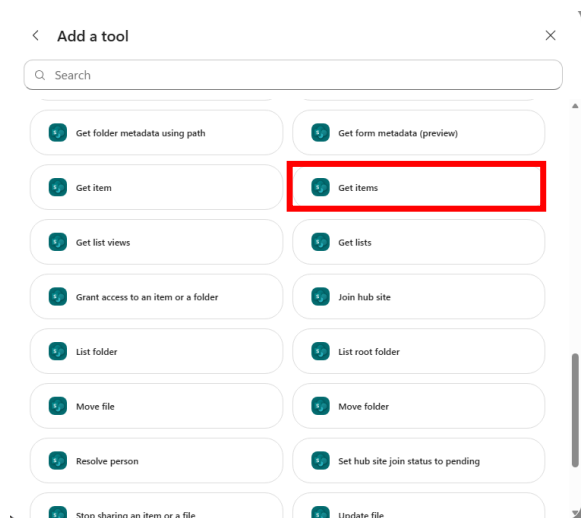

Task 11: Using Skills and Tools

Notes

9. We now need to add the tools that are needed for this skill.
Start by clicking on **'Tools'** on the right card.

Then find **'Get items'** under SharePoint. And click **'Add'**.

10. Configure Get item by giving it the **Site Address** and **List Name** (setting the input to **Custom**), provided in the Table Activity Material. Then click **'Done'**.

13. **Save** and navigate to the **Preview** tab, we can test our newly added skill by asking: **‘I have done 4 hours of volunteering at a soup kitchen for the past month’**.

You might see a Permission Required popup on your first run, click **‘Allow’**.

Permission Required

This agent is requesting permission to use SharePoint to perform: Update item. Allow this agent to proceed?

Allow Deny

I have done 4 hours of volunteering at a soup kitchen for the past month

Lik's Goal Tracking Agent

Thought for 4 seconds

- Loading skill: progress-update-hun
- Get items
- Update item

Your update has been logged successfully in SharePoint. Here's a summary:

Related Goal

Volunteer at a soup kitchen at least once every two weeks

Goal Category

Volunteering

Achievement Summary

You completed 4 hours of volunteering at a soup kitchen over the past month. This activity reflects your commitment to supporting the community and aligns with your goal of regular charitable engagement.

Progress Assessment

Estimated Progress: In Progress

Reasoning: The target is to attend at least 7 volunteering sessions by 31 December 2026. Completing 4 hours last month indicates consistent progress toward fulfilling the objective.

Blockers or Support Needed

None identified.

Suggested Next Steps

- Schedule your next soup kitchen volunteering session to maintain biweekly frequency.
- Track your total volunteer hours to monitor progress against the year-end target.
- Consider sharing feedback or ideas with the organization to enhance your experience and community impact.

☒ Your SharePoint goal has been updated, and the next review is set for 23 October 2026. Would you like me to also prepare a professional update for your manager or recommend additional volunteering opportunities?

Task 11: Using Skills and Tools

Notes

You should see the agent call the skill **progress-update**, and use the tools **Get items** and **Update item**.

14. Check the **Latest Update** column of your goal in **Goals List**, you should see your update reflected there.

Attend at least 7 volunteering sessions at a soup kitchen between now and 31 December 2026, and record dates of each attendance.	In Progress	12/31/2026	Completed 4 hours of volunteering at a community soup kitchen during the past month, contributing to the overall goal of regular service engagement.	10/23/2026

Activity Completion Checklist

Please tick off each item that you have completed:

☐

I created a new Goals Tracking Agent in the Github Harness Copilot Studio.

☐

I added **instructions** and **knowledge** to the agent.

☐

I added **skills**, with its name, description and instructions.

☐

I added and configured **tools** to either have custom input or **'Fill with AI'**.

Reflection Questions

Compared to the classic experience of Copilot Studio, what do you think this new experience (Github Harness) does better? What use cases benefit more from this new way of building agents?

How else would you extend this agent? What other functionality or features should it support?
